Stargate captures that unique moment when a droplet hits a calm pool of still water. The ripple effect travels outwards spreading indefinitely to the very edges of Stargate.

Smooth circular shapes expand limitlessly across the radiator providing texture and motion against an otherwise unbroken and even painted wall.

It is easy to become drawn to Stargate with all of your senses, resisting the curious urge to run your fingers across its wonderfully crafted surface. Stargate is produced in aluminium using specialist technology to create a flawless finish.
